Dear Lester Snow,

Enclosed please find our report to the U.S. Department of Interior Bureau of Reclamation and our formal CALFED comments on the Water Use Efficiency Component Technical Appendix.

We appreciate the opportunity to offer these comments. As we note in them, we believe the CALFED process has much to offer the California water community and we hope it succeeds. We also appreciated the cooperation of your staff during our efforts to prepare these comments. They clarified many issues for us and provided valuable information to help us understand the WUEC. Please take these comments as suggestions for making this component of CALFED stronger – that was our goal.

I look forward to helping you work through these comments, if you have any questions about them. I also would be happy to discuss any questions you might have about them.

Sincerely,

  
Dr. Peter H. Gleick  
Director
